Delivering Powerful Presentations™
PowerfulPoints

The Digital Programs

Business presentations today nearly always involve presenting digitally, while still working with PowerPoint, Keynote, Prezi or some other visual support. This digital presentation provides a number of challenges that traditional presentation training programs address, things like setting up the environment, maintaining engagement in the digital space, building relationship through technology to name a few.

Our **Delivering Powerful Presentations for Digital Presentations™** program has been designed from the perspective that most business presentations involve a speaker working with slides.

It is designed to give you the skills to present with power and authority, work with visuals effectively, engage with the audience and move them to take the desired action all through a camera and a virtual meeting. As a result, presentation outcomes and objectives are far more likely to be achieved.

Program outline:

1 Master the technology:
Learn how to use the technology to your benefit, whether it is Zoom, teams or Meet, to support your presentation. Learn tips on improving your image and impact via the virtual environment.

2 Create relationships and engagement:
You will have more influence over an audience that is positively disposed to you, but that is more challenging in a virtual environment. Learn techniques to help you get the audience on side throughout the presentation.

3 Get heard:
Learn how to get your message across in the most natural way. Change the context of wh at you are doing to empower yourself to be a truly effective presenter.

What our clients say:

Excellent workshop for presentations. Want more!
Mark Miranda, Service Delivery Manager, Attache Software

Delivering Powerful Presentations™ helps you to be more aware of how and what to present. A real career changer.
Carlos Young, Commercial Analyst, Campari Australia

Fantastic course! I learnt a lot of things I didn't realise I needed to know, but I'm very glad I know them now."
Ben Ng, Project Manager, Commonwealth Bank of Australia
